If you use a payroll processing company such as Paychex, they will report your new hires to AZ.

### 5 Withholding + Paying Taxes

Once wages are being paid, employers are required to withhold from their employees' paychecks various taxes and pay them to the IRS and to AZ periodically. The employers are also required to file, quarterly and annual reports with the IRS and AZ. In addition, the employers are subject to various taxes on those wages which must be paid to the IRS and AZ (A-1). Taxes withheld from employees are treated differently from taxes owed on income. **There are severe penalties for not paying them on time** and the liability survives bankruptcy. Therefore, employers should make sure that the payroll taxes are set aside for payment.

### 6 Payroll Processing

Because of the complexity and potential penalties involved with processing payrolls, we highly recommend that employers use a payroll processing company such as ADP, Paychex or another to process payroll. We do not provide this service. Over the years we have established an excellent working relationship with Paychex and we recommend them. One advantage for you is if you need service, we can contact our Paychex representative for help. Please call us for the name and phone number of our representative.

**Final word** If the above seems daunting, call us and we can help you with filling out the forms.
